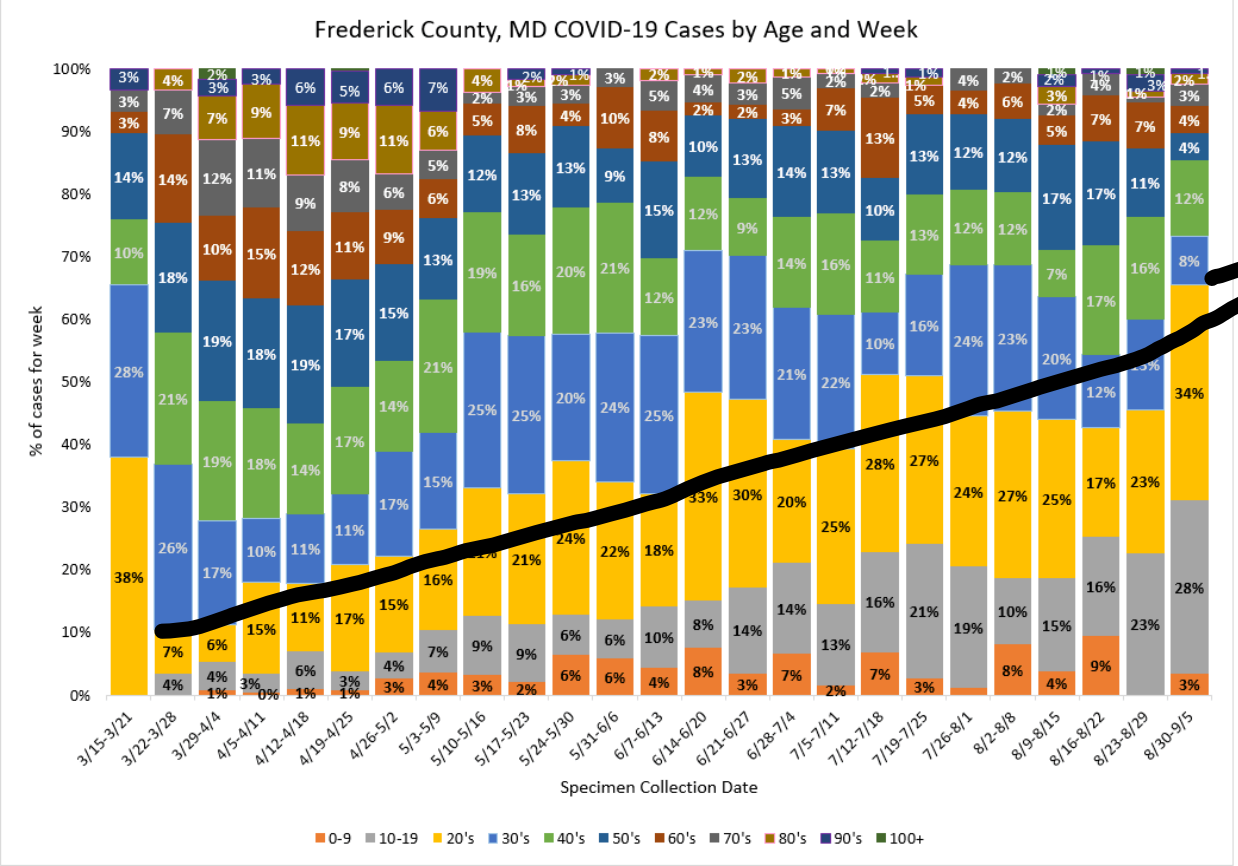
September 11, 2020

Dear Resident, Family Member and Staff:

Please take a moment today to remember those who were lost and injured in the attacks in New York, Washington DC and Shanksville PA on this day in 2001.

At the end of last week, almost 70 % of all COVID positive cases in Frederick County are in our younger adults. It remains extremely important that we protect our older adults from the younger adults who may be experiencing symptoms or not, from spreading the virus.



Edenton will remain at Phase 2 and continue to monitor. No further testing has been needed and we are waiting to learn more about the POC testing units that are being announced in the media. Edenton currently has contracts with two labs for testing if needed on campus.

FLU SHOTS – Please mark your calendars for Thursday September 24th. In about two weeks, Edenton Residents and staff will receive flu shots here on campus. IL Residents should schedule thru Resident Services and AL Residents will be scheduled in block times after lunch.

Flu consent forms are here and can be signed at any time. For many Residents who can sign themselves, this will be done on the 24th. For those assisted living Residents who are NOT able to sign, the primary family member should coordinate with the nurse about signing in advance or providing a verbal authorization.

As always, if I can answer any questions or provide you with information, please reach out to me or another member of our phenomenal team at any time.

Be well,

RaeAnn Butler, Administrator
